

Since 1984

Compressed Air & Cooling Systems

Refrigeration Industrial Chillers

Mini Series: 0.75 to 7.5 TR

PRODUCT FEATURES

UNIQUE CO-EX HEAT EXCHANGERS (Mini series)

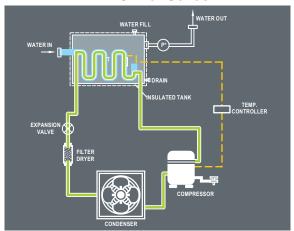

The Heat Exchanger is of COAXIAL type, the design maximizes exchanger efficiency by using Copper tubes in a coiled TUBE-IN-TUBE arrangement. Tube sizes are carefully chosen so that fluid velocities are maintained through the tubes. This promotes turbulence break up boundary and maximizes the heat transfer rate with minimum pressure drop.

To further increase heat transfer efficiency, a Counter Flow pattern is used that achieves the maximum temperature difference.

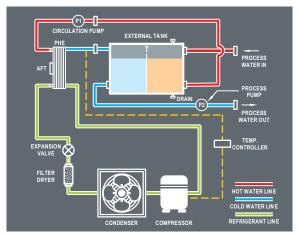

SPECIAL FEATURE OF CO-EX

- Full copper corrosion free heat exchanger
- Non-fouling exchanger
- Co-Axial arrangement, tends to minimize space requirement
- Minimises power consumption
- No leakage
- Low pressure drop
- High efficiency
- Corrossion free light weight FRP tank

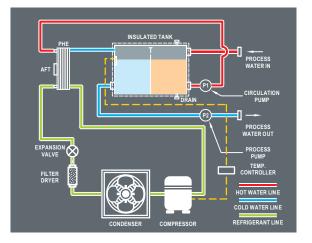

Mini Chiller Series

Max Chiller Series
With External Tank

Max Chiller Series
With Internal Tank

- » Compact occupies minimum space
- » Built in closed tank for thermal mass operation
- » High pressure pump for reliable operation for specific application
- » Microprocessor control
- » Reduced Maintenance
- » More heat transfer area
- » Energy efficient fans
- » Environment friendly R407C refrigerant used
- » Electronic expansion valve (optional)
- Remote and water cooled condenser (optional)

BRAZED PLATE TYPE HEAT EXCHANGER (Max series)

The brazed plate heat exchanger is variation of the traditional gasketed plate type heat exchanger. It is designed to have lower pressure drop. It consists of stainless steel (AISI 316) plates and two end plates. The plates are brazed (99% copper) together in a vacuum oven to form a compact pressure-resistant unit. This compact design can easily be mounted directly in piping without brackets and foundations.

PUMP: High pressure, high volume pump with mechanical seal for long life and no leakage. The pump is capable of working 24 hours a day throughout the year. No need of stand-by pump. Pump motor has an overload protection.

TANK: Stainless steel well insulated tank to save power due to no heat transfer from closed tank.

FRAME: Rigid steel frame construction covered with easy removable steel covering, free accessible maintenance of all internal components, weather resistant power coating finish.

CONTROL PANEL: PLC based control panel is totally enclosed, dust proof, complete with all necessary switching, control and safety devices in accordance with applicable codes

Compressors are protected with overloads and safety trips.

GAUGES & SWITCHES: Standard high pressure and low pressure refrigeration gauges.

Adjustable low pressure and fan pressure switches for flexibility in operation.

Unit is self contained of **environmental and energy saving design**. All equipment are factory tested prior to delivery.

OPERATION: Adjacent plates form flow channels carrying alternately hot and cold media throughout the plate pack.

All port connections are located in the fixed frame plate proving a low maintenance installation.

Provided the number of passes is the same for both media nearly 100% counter-flow will be achieved

ADVANTAGES:

- Efficient heat transfer between refrigerant and water.
- Low weight
- Flexibility & easy by adding or removing plates

EASE OF INSTALLATION: All chillers are shipped pre-piped and wired, ready to install and operate, installation is made easy with conveniently located Water and Drain connections.

SERVICE: GEM CHILLERS are designed to require minimum maintenance. Should service be necessary, a team of trained technicians is available to answer your questions about installation, operation and maintenance or repair. A complete inventory of spare parts is maintained at the factory and channel partners & local service providers located all over India

Model Nomenclature (Mini series):

- 1 1/3 bar air cooled, Tube In Tube
- P 1/3 bar air cooled, with PHE

Model Nomenclature (Max series):

- → Blank Internal tank with process pump in customer scope
 - Pump in Customer Scope

SIZING CONVERSION FACTORS:

Operating condition

| | Ideal | Maximum |
|--------------------------|---------|-----------|
| Water Outlet Temperature | 15° C | |
| Ambient Temperature | 40° C | |
| Water Thermal Difference | 5° C | |
| Refrigerant Used | R22 | 0.01 |
| Water Inlet Pressure | 1 bar g | 2-3 bar g |

Ambient Temperature: (C1)

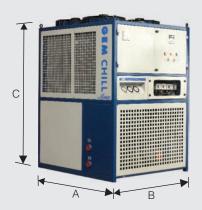

| Ambient Temperature, °C | 30 | 35 | 40 | 45 | 50 |
|-------------------------|-----|-----|----|-----|-----|
| Conversion Factor | 1.2 | 1.1 | 1 | 0.9 | 0.8 |

Water Outlet temperature: (C2)

| Water Outlet Temperature, °C | 5 | 10 | 15 | 20 | 25 |
|------------------------------|-----|------|----|------|-----|
| Conversion Factor | 0.6 | 0.75 | 1 | 1.16 | 1.3 |

TYPICAL APPLICATION

Chemical Industry Food & Beverage Industry Glass Industry Pharmaceutical Industry Plastic Industry

Distilleries / Breweries
Health Care / Hospitals
Metal Spraying
Oil Cooler
Oncology Machine
Printing Process
PET - Stretch Blow Moulding
Process Chilling
Textile Processing
Welding Machine
and many more
